

Stephen Marn

Data Engineer | Machine Learning & Analytics Lead

Raleigh, Durham, Chapel Hill, North Carolina | Phone: 814-882-8615 | Email: stevemarn27@gmail.com

Portfolio: <https://steve27m.github.io/> and <https://github.com/> Production-grade, terms-compliant data-engineering & ML pipelines (DuckDB · dbt · Python/R · Grafana/Quarto dashboards, LLM-narrated observability) with live public dashboards.

Professional Summary

Data engineer and analytics leader with 6 years turning raw operational data into automated, governed decision systems. Built an enterprise analytics function from scratch; pipelines, data architectures, custom software, and production ML as a one-person team; now an M.S. Analytics candidate at Georgia Tech targeting AI/ML, data-engineering, data science, and analytics leadership roles.

Core Competencies/Skills

Data Engineering: Python, SQL, ETL/ELT pipeline automation, data modeling (medallion & Kimball star-schema), dbt, DuckDB, BigQuery, workflow orchestration (Dagster, GitHub Actions), data governance & quality testing

Machine Learning & AI: Model development & deployment (scikit-learn), feature engineering, model evaluation, forecasting, LLM integration (RAG & local inference)

Analytics & BI: Grafana, Power BI, Tableau, SSRS, statistical modeling, executive & self-service reporting

Software & Tooling: Python, R, SQL, C++, Git/GitHub, FastAPI, Quarto

Leadership: Building & running analytics functions, stakeholder engagement, project & change management, team leadership (4–80 personnel)

Professional Experience

Senior Data Analyst → Data Engineer & Analytics Lead | *Banknote Corporation of America* | Jan 2025 - Present

- **Built the company's first analytics function as a one-person team**, evolving the role from BI/data analyst into full data-engineering ownership within 18 months.
- **Engineered automated data pipelines and analytical data models**, replacing manual Excel/PowerPoint workflows with governed, refreshable data products.
- **Stood up a modern BI, reporting, and software stack** (Grafana, Power BI, custom reporting and applications), delivering real-time operational visibility across the organization.
- **Designed and implemented data architectures and a governed analytical function**; owning data modeling, quality standards, and reporting end to end.
- **Developed and deployed machine-learning tools** supporting operational forecasting and data-driven decision-making.
- **Served as lead contributor on an IoT activation project**, instrumenting the shop floor to automate collection and data processing for product tracking and manufacturing analytics.
- **Spearheaded digital transformation**, leading MRP system adoption with full project lifecycle management and delivering executive insights that inform senior management strategy.

Data Analyst | *nVent* | May 2023 – Dec 2024

- **Built live data pipeline infrastructure** serving 30+ daily users, upgrading from 3-hour to real-time updates.
- **Automated SQL reporting processes** reducing manual work and improving operational decision-making.

Stephen Marn

Data Engineer | Machine Learning & Analytics Lead

Raleigh, Durham, Chapel Hill, North Carolina | Phone: 814-882-8615 | Email: stevemarn27@gmail.com

- **Performance Accountability Award** recipient for delivering measurable business impact.

Anti Money Laundering Analyst | *AML Right Source* | Mar 2021 – Apr 2023

- **Eliminated 3,000+ application backlog** within 3 months, streamlining customer onboarding processes.
- **Reduced manual processing time by 50%** through advanced data analysis and process optimization techniques.
- **Developed fraud detection systems** using statistical methods for fintech and digital payment platforms.

Operations Manager | *Army National Guard* | May 2020 - Present

- **Led operations teams of 4-80 personnel** managing \$5M+ in equipment across 5 major training exercises.
- **Delivered strategic analysis** during NATO operations in Latvia/Lithuania (2022-2023).
- **Currently manage analytics coordination** for complex multi-system operations and reporting processes.

Education & Certifications

M.S. Analytics, Computational Analytics Track | *Georgia Institute of Technology* | 2025 - Present

- Machine learning, big-data analytics, computational statistics, operations research, and high-dimensional data methods.

M.S. Applied Intelligence | *Mercyhurst University* | 2022-2024

- Advanced quantitative and qualitative analytics, targeting, strategic intelligence research, .

Data Science Foundations Coursework | *Guilford Technical Community College* | 2024-2025

- Advanced mathematics (calculus and linear algebra), computer science (C++), and statistics; quantitative foundation for graduate analytics study.

BA International Studies | *Virginia Military Institute* | 2016-2020

- Economics, Political Science, Linguistics; Military Leadership and Proficiency Award recipient.

Applied Data Science Certificate | *Massachusetts Institute of Technology (MIT)* | 2023

- Machine learning, advanced statistical modeling, predictive analytics, computer science skills.

Key Technical Achievements

- **End-to-End Analytics Function:** Built an enterprise data & analytics capability solo — pipelines, data models, production ML, and a Grafana/Power BI/custom-software stack — in 18 months (Banknote).
- **Production Machine Learning:** Developed and deployed ML tools driving operational forecasting and decisions (Banknote).
- **Live Data Pipeline Development:** Created real-time reporting systems serving 30+ daily users, upgrading from 3-hour delays (nVent).
- **Large-Scale Project Management:** Cleared a 3,000+ fintech/cryptocurrency application backlog to zero (AML Right Source).
- **Public Portfolio:** Published production-grade, terms-compliant DE/ML pipelines with live dashboards at github.com/Steve27M.
